Lemon-Aid New Cars and Trucks 2013-Phil Edmonston 2012-12-01

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm."

There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

The Dynamics of Persuasion-Richard M. Perloff 2016-12-19

The Dynamics of Persuasion has been a staple resource for teaching persuasion for nearly two decades. Author Richard M. Perloff speaks to students in a style that is engaging and informational, explaining key theories and research as well as providing timely and relevant examples. The companion website includes materials for both students and instructors and expanding the pedagogical utilities. The sixth edition includes: updated theoretical and applied research in a variety of areas, including framing, inoculation, and self-affirmation; new studies of health campaigns; expanded coverage of social media marketing; enhanced discussion of the Elaboration Likelihood Model in light of continued research and new applications to everyday persuasion. The fundamentals of the book - emphasis on theory, clear-cut explanation of findings, in-depth discussion of persuasion processes and effects, and easy-to-follow real-world applications - continue in the sixth edition.

The Everything Store-Brad Stone 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading

Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Naked Statistics: Stripping the Dread from the Data-Charles Wheelan

2013-01-07 "Brilliant, funny . . . the best math teacher you never had."—San Francisco Chronicle Once considered tedious, the field of statistics is rapidly evolving into a discipline Hal Varian, chief economist at Google, has actually called "sexy." From batting averages and political polls to game shows and medical research, the real-world application of statistics continues to grow by leaps and bounds. How can we catch schools that cheat on standardized tests? How does Netflix know which movies you'll like? What is causing the rising incidence of autism? As best-selling author Charles Wheelan shows us in Naked Statistics, the right data and a few well-chosen statistical tools can help us answer these questions and more. For those who slept through Stats 101, this book is a lifesaver. Wheelan strips away the arcane and technical details and focuses on the underlying intuition that drives statistical analysis. He clarifies key concepts such as inference, correlation, and regression analysis, reveals how biased or careless parties can manipulate or misrepresent data, and shows us how brilliant and creative researchers are exploiting the valuable data from natural experiments to tackle thorny questions. And in Wheelan's trademark style, there's not a dull page in sight. You'll encounter clever Schlitz Beer marketers leveraging basic probability, an International Sausage Festival illuminating the tenets of the central limit theorem, and a head-scratching choice from the famous game show Let's Make a Deal—and you'll come away with insights each time. With the wit, accessibility, and sheer fun that turned Naked Economics into a bestseller, Wheelan defies the odds yet again by bringing another essential, formerly unglamorous discipline to life.

Space Invaders-Nona Fernández 2019-11-05 Longlisted for the National Book Award for Translated Literature A dreamlike evocation of a generation that grew up in the shadow of a dictatorship in 1980s Chile Space Invaders is the story of a group of childhood friends who, in adulthood, are preoccupied by uneasy memories and visions of their classmate Estrella González Jepsen. In their dreams, they catch glimpses of Estrella's braids, hear echoes of her voice, and read old letters that eventually, mysteriously, stopped arriving. They recall regimented school assemblies, nationalistic class performances, and a trip to the beach. Soon it becomes clear that Estrella's father was a ranking government officer implicated in the violent crimes of the Pinochet regime, and the question of what became of her after she left school haunts her erstwhile friends. Growing up, these friends—from her pen pal, Maldonado, to her crush, Riquelme—were old enough to sense the danger and tension that surrounded them, but were powerless in the face of it. They could control only the stories they told one another and the "ghostly green bullets" they fired in the video game they played obsessively. One of the leading Latin American writers of her generation, Nona Fernández effortlessly builds a choral and constantly shifting image of young life in the waning years of the dictatorship. In her short but intricately layered novel, she summons the collective memory of a generation, rescuing felt truth from the oblivion of official history.

Latoya Ruby Frazier: The Last Cruze-Latoya Ruby Frazier 2020-06-15 As the General Motors plant in Lordstown, Ohio halted production and faced possible closure, displacing its workers, artist LaToya Ruby Frazier joined with these workers, their families, and their local union leaders to tell the story of the plant in its final days. After more than fifty years of automobile production and a commitment to manufacture the Chevrolet Cruze until 2021, the facility was recently "unallocated" by GM, as the company shifts its focus toward overseas manufacturing and the production of electric and autonomous vehicles. For many, this meant uprooting their families and giving up the support of a close-knit community. Those who turned down transfers to GM plants in other states lost their income, pensions, and benefits. *The Last Cruze*, which sets out to amplify the voices of the auto workers in Lordstown, introduces a new chapter to Frazier's work in investigating labor, family, community, and the working class. Exhibited at the Renaissance Society in 2019, this body of work includes over sixty photographs, alongside the written stories of the workers, and was staged within an installation that echoes the structure of the plant's assembly line. This substantial catalogue includes extensive documentation of the work and introduces new essays and dialogues by contributors including Coco Fusco, David Harvey, Werner Lange, Lynn Nottage, Julia Reichert, Benjamin Young, and members of the local chapter of the United Auto Workers.

The Prince of los Cocuyos-Richard Blanco 2014-09-30 A poignant, hilarious, and inspiring memoir from the first Latino and openly gay inaugural poet, which explores his coming-of-age as the child of Cuban immigrants and his attempts to understand his place in America while grappling with his burgeoning artistic and sexual identities. Richard Blanco's childhood and adolescence were experienced between two imaginary worlds: his parents' nostalgic world of 1950s Cuba and his imagined America, the country he saw on reruns of *The Brady Bunch* and *Leave it to Beaver*—an "exotic" life he yearned for as much as he yearned to see "la patria." Navigating these worlds eventually led Blanco to question his cultural identity through words; in turn, his vision as a writer—as an artist—prompted the courage to accept himself as a gay man. In this moving, contemplative memoir, the 2013 inaugural poet traces his poignant, often hilarious, and quintessentially American coming-of-age and the people who influenced him. A prismatic and lyrical narrative rich with the colors, sounds, smells, and textures of Miami, Richard Blanco's personal narrative is a resonant account of how he discovered his authentic self and ultimately, a deeper understanding of what it means to be American. His is a singular yet universal story that beautifully illuminates the experience of "becoming;" how we are shaped by experiences, memories, and our complex stories: the humor, love, yearning, and tenderness that define a life.

Music in American Life: An Encyclopedia of the Songs, Styles, Stars, and Stories that Shaped our Culture [4 volumes]-Jacqueline Edmondson Ph.D. 2013-10-03 A fascinating exploration of the relationship between American culture and music as defined by musicians, scholars, and critics from around the world.

The Science of Effective Mentorship in STEMM-National Academies of Sciences, Engineering, and Medicine 2020-01-24 Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEMM and subsequently improving the training environment in which that STEMM potential is fostered. Mentoring relationships provide developmental spaces in which students' STEMM skills are honed and pathways into STEMM fields can be discovered. Because mentorship can be so influential in shaping the future STEMM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. *The Science of Effective Mentorship in STEMM* studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEMM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members.

Going Clear-Lawrence Wright 2013-01-17 National Book Award Finalist A clear-sighted revelation, a deep penetration into the world of Scientology by the Pulitzer Prize-winning author of *The Looming Tower*, the now-classic

study of al-Qaeda's 9/11 attack. Based on more than two hundred personal interviews with current and former Scientologists—both famous and less well known—and years of archival research, Lawrence Wright uses his extraordinary investigative ability to uncover for us the inner workings of the Church of Scientology. At the book's center, two men whom Wright brings vividly to life, showing how they have made Scientology what it is today: The darkly brilliant science-fiction writer L. Ron Hubbard, whose restless, expansive mind invented a new religion. And his successor, David Miscavige—tough and driven, with the unenviable task of preserving the church after the death of Hubbard. We learn about Scientology's complicated cosmology and special language. We see the ways in which the church pursues celebrities, such as Tom Cruise and John Travolta, and how such stars are used to advance the church's goals. And we meet the young idealists who have joined the Sea Org, the church's clergy, signing up with a billion-year contract. In *Going Clear*, Wright examines what fundamentally makes a religion a religion, and whether Scientology is, in fact, deserving of this constitutional protection. Employing all his exceptional journalistic skills of observation, understanding, and shaping a story into a compelling narrative, Lawrence Wright has given us an evenhanded yet keenly incisive book that reveals the very essence of what makes Scientology the institution it is.

American Jewish Year Book 2019-Arnold Dashefsky 2020-07-02 Part I of each volume will feature 5-7 major review chapters, including 2-3 long chapters reviewing topics of major concern to the American Jewish community written by top experts on each topic, review chapters on "National Affairs" and "Jewish Communal Affairs" and articles on the Jewish population of the United States and the World Jewish Population. Future major review chapters will include such topics as Jewish Education in America, American Jewish Philanthropy, Israel/Diaspora Relations, American Jewish Demography, American Jewish History, LGBT Issues in American Jewry, American Jews and National Elections, Orthodox Judaism in the US, Conservative Judaism in the US, Reform Judaism in the US, Jewish Involvement in the Labor Movement, Perspectives in American Jewish Sociology, Recent Trends in American Judaism, Impact of Feminism on American Jewish Life, American Jewish Museums, Anti-Semitism in America, and Inter-Religious Dialogue in America. Part II-V of each volume will continue the tradition of listing Jewish Federations, national Jewish organizations, Jewish periodicals, and obituaries. But to this list are added lists of Jewish Community Centers, Jewish Camps, Jewish Museums, Holocaust Museums, and Jewish honorees (both those honored through awards by Jewish organizations and by receiving honors, such as Presidential Medals of Freedom and Academy Awards, from the secular world). We expand the Year Book tradition of bringing academic research to the Jewish communal world by adding lists of academic journals, articles in academic journals on Jewish topics, Jewish websites, and books on American and Canadian Jews. Finally, we add a list of major events in the North American Jewish Community.

Understanding the Global Energy Crisis-Richard A. Simmons

2014-03-15 We are facing a global energy crisis caused by world population growth, an escalating increase in demand, and continued dependence on fossil-based fuels for generation. It is widely accepted that increases in greenhouse gas concentration levels, if not reversed, will result in major changes to world climate with consequential effects on our society and economy. This is just the kind of intractable problem that Purdue University's Global Policy Research Institute seeks to address in the Purdue Studies in Public Policy series by promoting the engagement between policy makers and experts in fields such as engineering and technology. Major steps forward in the development and use of technology are required. In order to achieve solutions of the required scale and magnitude within a limited timeline, it is essential that engineers be not only technologically-adept but also aware of the wider social and political issues that policy-makers face. Likewise, it is also imperative that policy makers liaise closely with the academic community in order to realize advances. This book is designed to bridge the gap between these two groups, with a particular emphasis on educating the socially-conscious engineers and technologists of the future. In this accessibly-written volume, central issues in global energy are discussed through interdisciplinary dialogue between experts from both North America and Europe. The first section provides an overview of the nature of the global energy crisis approached from historical, political, and sociocultural perspectives. In the second section, expert contributors outline the technology and policy issues facing the development of major conventional and renewable energy sources. The third and final section explores policy and technology challenges and opportunities in the distribution and consumption of energy, in sectors such as transportation and the built environment. The book's epilogue suggests some future scenarios in energy distribution and use.

The Universal Machine-Ian Watson 2012-05-17 The computer unlike other inventions is universal; you can use a computer for many tasks: writing, composing music, designing buildings, creating movies, inhabiting virtual worlds, communicating... This popular science history isn't just about technology but introduces the pioneers: Babbage, Turing, Apple's Wozniak and Jobs, Bill Gates, Tim Berners-Lee, Mark Zuckerberg. This story is about people and the changes computers have caused. In the future ubiquitous computing, AI, quantum and molecular computing could even make us immortal. The computer has been a radical invention. In less than a single human life computers are transforming economies and societies like no human invention before.

The Neurology of Religion-Alasdair Coles 2019-10-31 This intriguing and innovative book examines what can be learnt about the brain mechanisms underlying religious practice from studying people with neurological disorders, such as strokes, epilepsy, and Parkinson's disease. Using a clinical case-study approach, the book analyses the interaction of social influences, religious upbringing, and neurological disorders on beliefs in a number of different religions. The interdisciplinary angle of the book ensures a variety of perspectives to help understand how religious beliefs are affected when cognitive function is impaired. Real examples are used throughout the book, enabling readers to view people's religious experience in context as opposed to simulated scenarios. Examples include people whose beliefs change due to neurological conditions, as well as how faith can help people in coping with these disorders.

American Graffiti- 1972

A Time for Truth-Ted Cruz 2015-06-30 In the Senate, I've tried to do two things: tell the truth, and do what I said I would do. We should expect that from every single elected official. Washington D.C. desperately needs leaders who aren't afraid to tell the truth. And Ted Cruz tells the truth—about political collusion, a corrupted legislative process, and the bureaucratic barriers to actually fixing the enormous challenges we face. Cruz's truth-telling habit hasn't made him popular in Washington. But it has earned him millions of supporters nationwide. Since his election to the Senate in 2012, Ted Cruz has refused to go along with the established way of doing business in Washington. In *A Time for Truth*, the outspoken Texas Senator tells his story for the first time—the story of a Cuban immigrant's son who made it to the Ivy League, to the Supreme Court bar, and eventually to the U.S. Senate. It's a deeply personal journey that begins with Cruz's father's experience of brutality in a Cuban prison and ends with Cruz's discovery that Washington has neither the courage nor the desire to do what is needed to preserve the freedom and opportunities that gave hope to his father and millions like him. Cruz discusses his role in the 2000

recount, helping to elect a president he respects—and whom he would have to stand up to a few short years later when he served as the solicitor general of Texas. He provides a behind-the-scenes look at his remarkable grassroots campaign for the U.S. Senate. And he reveals the true story behind his twenty-one-hour Senate filibuster, where he gave the most famous bedtime reading of *Green Eggs and Ham* in history. Pulling back the curtain on the backroom deals in Congress between Republicans, Democrats, and the lobbyists who keep them in office—instead of keeping them accountable—Cruz offers an inside look at what has gone so very wrong in our nation's capital. But he also makes an optimistic case that by reestablishing the principles of our founders, the opportunities for our citizens, and our unique place in the world, we can reignite the promise of America for generations to come. *A Time for Truth* is sharp, funny, and honest. What Cruz reveals will win him few friends in Washington. Then again, that isn't why he went there in the first place.

Growing with America-Jospeh M. Fox 2006-10-18 This book tells of a voyage of discovery by the author, a retired Bechtel chief process engineer and chemical engineering society director, whose previous writings concerned Methane Valorization and Fischer-Tropsch Reactor Design. Trying to explain why a thirteen year old boy would join a Quaker expedition to Philadelphia in 1686 he devises a fictionalized account that is eventually supported by genetic testing. Along the way he discovers, among his ancestors, a master carpenter turned politician, Americas first golf club owner and a doctor of whom it was written, There was a popular notion that he cured his patients. He finds a Young Squire who taunts the British with school pamphlets during the Revolutionary War and several Quakers who were sent off to Virginia during that war - much as we locked up the Japanese during World War II. While written as a family history, the reader will find tie-ins to Benjamin Franklins papers, to Shakespeares *The Tempest*, to a British diarist who wrote about William Wordsworth and to an anti-slavery tract by Fanny Kemble. The book sheds light on familys papers kept under wraps at historical libraries but leaves the final answers up to future generations. In the authors own words, "I became interested in Fox family genealogy as a result of a business trip to Bechtels London Office in 1974. While there as the process design manager for an Algerian Liquefied Natural Gas project, I took the opportunity to visit the Friends Library on Euston Road. There I found a family tree called *Descendants of Francis Fox of St. Germans*, by Joseph Foster and also Anne Cressons biography of my own ancestor, Joseph Fox, who had been Speaker of the Pennsylvania Assembly during the Stamp Act uproar. I also located several books that seemed of immediate interest: *The Journals of Caroline Fox 1835-1871*, edited by Wendy Monk, and a biography, *Caroline Fox*, by Wilson Harris. These gave the approximate locations of several family estates out in Cornwall near Falmouth. There had been many famous visitors to these estates; men such as Wordsworth, Tennyson, Mill and Carlyle, and Caroline Fox had described their conversations in her Journals. "I then convinced a fellow process design engineer, Bob Chu, to drive with me out to Falmouth over a weekend. There we found the closed offices of G. C. Fox & Company, shipbrokers, and the Fox Rosehill Gardens but no other sign of Fox activity. I was a little discouraged. Bob was intrigued, however, and insisted we investigate further. So on Sunday morning we drove further west and found the Glendurgan estate, with foxes on the gateposts and Mrs. Philip Hamilton (Rona) Fox about to start up a lawnmower in the garage. She immediately dropped what she was doing and led us into her house where notes were compared on family connections. One of Francis Foxs sons had sailed to Philadelphia in 1686 on the same ship as Justinian Fox, my own ancestor. "Bob and I then had a chance to tour the fabulous Glendurgan Gardens, just recently added to the National Trust. We also stopped off at Catchfrench, an estate in St. Germans, near Plymouth, where I sat in the ruins of the house where Francis Fox had lived in the mid-1600s. This was enough to send a chill up my spine and got me to thinking about recording all of this history. Back in London, Ronas second son, Charles Lloyd Fox, introduced me to more relatives. As is described in this book, our families have maintained this relationship ever since then. "Work on this book actually started in 1992 after I retired from Bechtel and my wife, Betty, died of Lupus, both in rapid succession. I joined a Creative Writing Extension Class run by U. C. Berkeley and, for my project, started the fictionalized account recorded in the first two chapters of this book. I had learned that Justinian had only been 13 years old when he joined t

The Night Tiger-Yangsze Choo 2019-02-12 The Reese Witherspoon x Hello Sunshine Book Club Pick INSTANT NEW YORK TIMES BESTSELLER "A sumptuous garden maze of a novel that immerses readers in a complex, vanished world." —Kirkus (starred review) An utterly transporting novel set in 1930s colonial Malaysia, perfect for fans of Isabel Allende and Min Jin Lee Quick-witted, ambitious Ji Lin is stuck as an apprentice dressmaker, moonlighting as a dancehall girl to help pay off her mother's Mahjong debts. But when one of her dance partners accidentally leaves behind a gruesome souvenir, Ji Lin may finally get the adventure she has been longing for.

Eleven-year-old houseboy Ren is also on a mission, racing to fulfill his former master's dying wish: that Ren find the man's finger, lost years ago in an accident, and bury it with his body. Ren has 49 days to do so, or his master's soul will wander the earth forever. As the days tick relentlessly by, a series of unexplained deaths racks the district, along with whispers of men who turn into tigers. Ji Lin and Ren's increasingly dangerous paths crisscross through lush plantations, hospital storage rooms, and ghostly dreamscapes. Yangsze Choo's *The Night Tiger* pulls us into a world of servants and masters, age-old superstition and modern idealism, sibling rivalry and forbidden love. But anchoring this dazzling, propulsive novel is the intimate coming-of-age of a child and a young woman, each searching for their place in a society that would rather they stay invisible. "A work of incredible beauty... Astoundingly captivating and striking... A transcendent story of courage and connection." —Booklist (starred review)

How To Watch Television-Ethan Thompson 2013-09-16 Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.

Essentials of Contemporary Management-Gareth R. Jones 2007 Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. *Essentials of Management* concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

American Cars, 1946-1959-J. "Kelly" Flory, Jr. 2009-12-11 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details

every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

Code Name Zeus-Gary Andersen 2015-10-28 *Code Name: Zeus* is a story about immigrants from several countries coming together in a remote place in Texas to make their way as Americans. They left their grim existences in faraway parts of the world with no assurance they would find success and happiness. Kursk, TX and surrounding area, settled by German Russian immigrants in the early 20th century, suffered greatly from the dual impact of the Dust Bowl years and the Great Depression, only to be saved by two other newcomers from Europe who are great believers in capitalism and the American way of life. After making a vast fortune starting on the streets of New Orleans, Louisiana, and around Beaumont, Texas, Russian immigrant Robert Barzinsky and his junior partner, Jack Barnett, a native of Ireland, move to Kursk. They ranch, drill for oil, and create a secret project to prepare for a major worldwide disaster with help of several techies. Government agencies and sinister organizations in the United States and around the world closely follow the activities in and around the small town.

Unlimited Horizons-Peter W. Merlin 2015 Designed as a stopgap measure to provide overhead reconnaissance capability during the early years of the Cold War, the versatile U-2 has since evolved to meet changing requirements well into the 21st century. Though many authors have documented the airplane's operational history, few have made more than a cursory examination of its technical aspects or its role as a NASA research platform. This volume includes an overview of the origin and development of the Lockheed U-2 family of aircraft with early National Advisory Committee for Aeronautics (NACA) and National Aeronautics and Space Administration (NASA) involvement, construction and materials challenges faced by designers and builders, releasable performance characteristics and capabilities, use of U-2 and ER-2 airplanes as research platforms, and technical and programmatic lessons learned.

Alcohol and Injuries-World Health Organization 2009 Alcohol-attributable injuries are of a growing concern to the public health community, with

alcohol-related injuries such as road traffic accidents, burns, poisonings, falls and drownings making up more than a third of the disease burden attributable to alcohol consumption. This publication synthesizes results of a number of hospital emergency department studies conducted in different cultural and health care settings, including the WHO Collaborative Study on Alcohol and Injuries. It provides an introduction to the epidemiology of alcohol-related injuries and refers to methodological issues of emergency department studies. It addresses public policy implications and equips the reader with practical information on interventions that can be implemented in emergency departments, such as screening and brief interventions for hazardous and harmful drinking. This book has been compiled by an international group of editors with extensive experience in the area of alcohol and injuries.

Making the Invisible Visible-National Space Administration 2017-11-03
This publication, "Making the Invisible Visible: A History of the Spitzer Infrared Telescope Facility (1971-2003)," makes visible the invisible forces that influenced the design of Space Infrared Telescope Facility (SIRTF's) innovative technology. The lessons learned by the project team over the course of building SIRTF, now better known as the Spitzer Space Telescope, are about managing innovation over time and in the face of uncertainty. These are universal lessons, applicable to any project whose stakeholders control the necessary resources. SIRTF's stakeholders focused on a variety of issues: technical, scientific, political, and economic, as well as organizational needs and goals. What made SIRTF's evolution particularly difficult was that the stakeholders changed over time-in their composition,

goals, and influence.

Chasing Alice-Stephanie Fowler 2020-06 This book explores the life, death, and legacy of Alice Davis, an English teacher from Parkside High School in Salisbury, Maryland. Alice was brutally murdered by her husband over Labor Day Weekend in 2011 and her community was turned upside down. The story is written by one of her former students, Stephanie L. Fowler.

Strategic Management-Gregory G. Dess 2005-01 Strategic Management: Text and Cases, 2nd Edition, by Dess/Lumpkin/Eisner is both readable and rigorous - written for today's student. A rocket-ship in its first edition, the revision continues to provide solid treatment of traditional topics in strategic management, as well as contemporary topics like entrepreneurship, knowledge management, and internet strategies. The prestigious author team understands the importance of thorough, modern concepts illustrated by rich, relevant and teachable cases. The new case selections emphasize variety, currency, and familiar company names. The cases are up-to-date in terms of both financial data and strategic issues. This group of cases gives both instructors and students unparalleled quality and variety. Based on consistent reviewer feedback, these selections combine comprehensive and shorter length cases about well known companies.
